Air Fresher

MODEL NO.: KJ-170

OPERATION MANUAL

RIGHT

WRONG

Forbid scattering water into machine’s upper body. If there is water on the machine when taking up the upper body, you must put the upper body vertically or aslant, place it on dry towel or use towel to dry the machines body. Don’t make the machine reverse laying in order to avoid the water inflowing into the machine body and shorten its using-life.

● **Drain and Clean**

Please change the water in time when it has been used for a long time or else it will be contaminated. The steps are as below:

- i. Turn off the power and unplug the machine.
- ii. Take off the upper body.
- iii. Empty the dirty water inside the tank, and clean the tank. If necessary, you may also add some detergent into the water for cleaning purpose.
- iv. Take the upper body and set it in right place.
- v. The machine needs cleaning every 3 months only.

III. Notice:

- The water-washing system won’t work if no enough water be filled, so please add water higher than the “MIN” level before turning on the machine.
- The machine should be placed on a water level surface. When carrying, please hold the bottom steadily.
- Clean the surface of body with cloth.
